NaturalSolutions
FOUNDATION

Introduction

My name is Rima E. Laibow, MD. I am the Medical Director of the Natural Solutions Foundation, the initiator of www.DrRimaRecommends.com and, along with Ralph Fucetola, JD, host of the livestream Dr. Rima Truth Reports. In 2004 my husband, Maj. Gen. Albert N. Stubblebine III (US Army, Ret.) and I founded the Natural Solutions Foundation.

I have practiced medicine and psychiatry for nearly a half a century since my graduation from the Albert Einstein College of Medicine in 1970. I do not use any form of pharmaceutical drugs or vaccines in my practice, nor do I use them in my life. Over nearly half a century I have learned that **health is served by NOT using drugs and vaccines but that ill-health is CAUSED or worsened by them. I have also learned that it is much harder to cure a condition (including cancer) that has been “treated” with pharmaceuticals than the same condition in which they have not been used.**

In some ways, although most people have been unaware of long-laid plans to destroy the vast majority of the human population, the information in this ebook is as old as mammalian life and as new as tomorrow's [managed] news.

Mammals in groups often cooperate. Sometimes they compete. Sometimes that competition can be to the death within groups although fights to the death are more frequent outside of the group.

Man¹ kills for passion, resources, genetic and social dominance and, frighteningly, for beliefs. Rarely have humans created an ideology built on such massive intentional destruction as the Fabian Socialists/Masons/Illuminati/Overpopulation Mythmakers/UK Labor Party and rarely have they so carefully, stealthily and with such determination emplaced the pieces of that massive destruction which we now call 'Global Governance', the 'New World Order' or a 'One World Religion'.

Twelve years ago, when Maj. Gen. Albert N. Stubblebine III and I created the Natural Solutions Foundation it was clear that the rights of each of us to self-determination in every aspect of our lives were under consistent, persistent, well-orchestrated attack. As we sought to understand this persistent, insistent and insane attack, it became clear that it was not just mediated by pharmaceutical/agricultural/biotech profit-seeking. We came to understand, reluctantly and with real dismay and horror, that the end goal was population enslavement bolstered by a huge genocide to reduce that population drastically solely for the purposes of the would-be controllers.

The revelation and reality were so shocking, and so crucial, that General Bert and I decided to close our New York State practice of drug-free medicine in order to create – and devote ourselves to - an

¹ Generic term for humans without gender meaning or bias.

Natural Solutions Foundation
PRIVILEGE & CONFIDENTIAL

organization that could fight effectively to reverse that trend and enlighten enough people to take targeted action to reverse this course to slavery and mass murder.

At that time, using the word “genocide” about things to come (rather than those in the past) automatically branded you as part of the lunatic fringe. Global conspiracy discussions cemented your diagnosis as a lunatic regardless of whether you were right or not. We persisted in truth telling, regardless of the negative labels and fierce, well-orchestrated smears and attacks.

What is crazy, though, is not the use of “The G Word”, but the reality, now widely understood, of that agenda and the implacable and nearly unthinkable brutal realities that lie ahead for us all if we do nothing to stop it.

There is a linked, and horrifyingly effective, circle of control, a cartel that has captured virtually every major industrial sector to bring it in line with these aims and use its unique characteristics for that purpose.

The principle industries of death are:

- Medicine/pharmaceutical drugs/vaccines
- Industrial food (GMOs, agrochemicals/fertilizers/preservatives/sweeteners and other food chemicals)
- War
- Power generation (nuclear and fossil fuels)
- Communication (micro-wave technologies, information control and surveillance)

These sectors are, at base, one enormous cartel, one industry and the deep level controllers have, in fact, one common driving force propelling them which goes well beyond money (the obvious driver): the creation of a master minority (the “neo-aristocrats”, as they like to style themselves) and a slave majority (serfs and technicians).

The masters of industry and of history² claim that they are the “enlightened” or “illuminated ones” and have long held to the idea that they can, should and, in their demented reasoning, must, control the world to their benefit.³

Of course, the total population is intended to be just a tiny fraction, less than 1/10, of the current population. They will be compressed into just 1% of the planet’s surface and will live in tiny habitations without significant personal property or options such as cars, choice or personal freedom. See UN Agenda 21, now Agenda 20/30.⁴

To eliminate us, who are the, to the would-be masters, unnecessary, irrelevant and burdensome “Useless Eaters”, multiple strategies are needed to get rid of billions of people in a meaningful time frame, through decreased longevity and fertility as well as increased chronic and acute disease.

Vaccines, for example, which have been an intentional infertility vehicle and tool since at least the mid 1972 when the WHO (World Health Organization) was officially tasked with finding infertility

² It is, of course, axiomatic that the winners of each conflict re- write history to mirror, suit and serve themselves.

vaccines.^{5, 6} and discovered that by lacing tetanus vaccines with a human hormone necessary to carry a baby to term (HCG or Human Chorionic Gonadotrophin), a woman or girl receiving this by injection in the presence of strong immune irritants (i.e., adjuvants like aluminum or squalene⁷) would develop antibodies to the very hormone that she would produce when pregnant, forcing her body to destroy her own pregnancies – all of them - for the rest of her life.⁸

J. A. Miller looked at what WHO called their “Special Program” in human reproduction in 1972:

“The WHO began its “Special Programme” in human reproduction in 1972, and by 1993 had spent more than \$356 million on “reproductive health” research. It is this “Programme” which has pioneered the development of the abortifacient vaccine. Over \$90 million of this Programme’s funds were contributed by Sweden; Great Britain donated more than \$52 million, while Norway, Denmark and Germany kicked in for \$41 million, \$27 million, and \$12 million, respectively. The U.S., thanks to the cut-off of such funding during the Reagan-Bush administrations, has contributed “only” \$5.7 million, including a new payment in 1993 by the Clinton administration of \$2.5 million. Other major contributors to the WHO Programme include UNFPA, \$61 million; the World Bank, \$15.5 million; the Rockefeller Foundation, \$2.5 million; the Ford Foundation, over \$1 million; and the IDRC (International Research and Development Centre of Canada), \$716.5 thousand.”⁹

The Tetanus vaccine was selected and served as a good vehicle for this purpose for decades while the more recent HPV vaccine, which, according to the American College of Pediatricians can cause Premature Ovarian Failure (POF)^{10, 11} offers another depopulation tool.

Tetanus vaccines, like others, contain a witches’ brew of ingredients designed to make them highly irritating to the immune systems, which is necessary if the immune-mediated infertility is to be relied upon.¹²

¹⁰ . The overwhelming majority (76%) of VAERS reports since 2006 with ovarian failure, premature menopause, and/or amenorrhea are associated solely with Gardasil®. When VAERS reports since 2006 are restricted to cases in which amenorrhea occurred for at least 4 months and is not associated with other known causes like polycystic ovary syndrome or pregnancy, 86/89 cases are associated with Gardasil®, 3/89 with Cervarix™ and 0/89 with other vaccines administered independently of an HPV vaccine. <http://www.acped.org/the-college-speaks/position-statements/health-issues/new-concerns-about-the-human-papillomavirus-vaccine>

¹¹ <http://wonder.cdc.gov/vaers.htm>

¹² Vaccine components:

Thimerosal (Mercury)[an organo-mercury compound used as a preservative]

Aluminum potassium sulfate adjuvant,

Residual formaldehyde [used in vaccines to inactivate

the virus so the person being inoculated does not contract the disease]

Aluminum phosphate, 2-phenoxyethanol, sodium chloride,

Aluminum adjuvant [a proinflammatory ingredient which helps the vaccine work more quickly and more powerfully],

Residual glutaraldehyde

2-phenoxyethanol[a glycol either used as a preservative in vaccines], aluminum hydroxide,

sodium chloride, residual formaldehyde

Polysorbate 80 (Tween 80)[Also called Tween 80, Alkest 80, or Canarcel 80 (brand names) [used as an excipient (something to basically thicken a vaccine for proper dosing) and an emulsifier (something to bond the ingredients)]

Growth mediums in which the vaccines are produced and which inevitably find their way into the finished product:

Mueller and Miller medium (contains glucose, sodium chloride, sodium phosphate dibasic, monopotassium, phosphate,

In countries slated for depopulation, the vaccination programs make even less scientific sense than they do otherwise (but may make a lot “sense” to depopulationists). In those countries, ONLY women between 15 and 45 are the targets of the vaccine drives. That means that the tetanus vaccine is being pushed – hard – on women in their child-bearing years who are urged to receive 5 consecutive vaccines despite the facts that:

- Tetanus is much more common in men than women
- Tetanus vaccines are never given in multiple doses under ordinary circumstances
- Pregnant women are vaccinated to “prevent neonatal tetanus although neonatal tetanus can be easily prevented (e.g., sanitation) and eliminated with simple, inexpensive measures (e.g., Nano Silver 10 PPM)
- Tetanus vaccines are highly toxic and have *never* been tested for safety in pregnant women. They contain either mercury or aluminum OR BOTH and should never be given to pregnant women who can easily miscarry (and/or become permanently infertile thereafter)

*“In nature the HCG hormone alerts the woman’s body that she is pregnant and causes **the** release of other hormones to prepare the uterine lining for the implantation of the fertilized egg. The rapid rise in HCG levels after conception makes it an excellent marker for confirmation of pregnancy: when a woman takes a pregnancy test she is not tested for the pregnancy itself, but for the elevated presence of HCG.*

However, when introduced into the body coupled with a tetanus toxoid carrier, antibodies will be formed not only against tetanus but also against HCG. In this case the body fails to recognize HCG as a friend and will produce anti-hCG antibodies. The antibodies will attack subsequent pregnancies by killing the HCG which naturally sustains a pregnancy; when a woman has sufficient anti-hCG antibodies in her system, she is rendered incapable of maintaining a pregnancy.”¹³

WHO was, in fact, found to have participated in genocide in the Philippines in the mid 1990’s for involuntary sterilization of at least 3 million women through this vaccine regimen which has also been forced upon the Hill Tribes women of Thailand, the women of Central and South America, Asia and of Africa.¹⁴

None of these women, whether pregnant or not, were told that the vaccines they were being given, to “protect” them or their babies, sometimes voluntarily and sometimes not, were, in reality, going to cause them to lose the baby they were carrying and be forever unable to carry a baby again.

magnesium sulfate hydrate, ferrous sulfate heptahydrate, cystine hydrochloride, tyrosine hydrochloride, urasil hydrochloride, Ca-pantothenate in ethanol, thiamine in ethanol, pyridoxin-hydrochloride in ethanol, riboflavin in ethanol, biotin in ethanol, sodium hydroxide, beef
Heart infusion (de-fatted beef heart and distilled water), casein solution [A casein is a family of phosphoproteins commonly found in mammalian milk. 80% of the proteins in cow’s milk are casein]],
Peptone-based medium, extract of bovine muscle tissue, formaldehyde, ammonium sulfate
Modified Mueller-Miller casamino acid medium without beef heart infusion,
aluminum phosphate, sodium chloride,
Peptone-based medium (contains extract of bovine muscle tissue)
Modified Mueller-Miller casamino acid medium without beef heart infusion, 2-phenoxyethanol

<http://vaccines.procon.org/view.resource.php?resourceID=005206>

¹³ <http://thinktwice.com/birthcon.htm>

¹⁴ <https://www.pop.org/content/bad-blood-philippines>

In Kenya, the Catholic Bishops announced that they had discovered that the Tetanus vaccine doses being given to women in a WHO tetanus prevention drive were, in fact, laced with HCG leading to the involuntary sterilization of at least 500,000 Kenyan women.¹⁵

“Doctors from the Kenyan Catholic Doctors Association found an antigen causing miscarriage in the tetanus vaccinations that were administered to 2.3 million girls and women by the World Health Organization and UNICEF.

In October 2014, Dr. Wahome Ngare, a member of the Catholic Doctors Association, told Points of View at KTN Weekend Prime that the women of Kenya had been vaccinated with a new tetanus vaccine that had not come through the usual channels and stated that the Catholic Church administers 65 percent of all vaccines.”

Zika Virus is being presented as the brand new ‘threat du jour’ but the tactics behind its presentation and use are not new at all. For that reason, the information in this eBook is at once up to date and as old as time immemorial.

Humans are different from other mammals in some ways and identical in others. But without doubt, we are technologically far more sophisticated than baboons or wolves, far crueler and far more insatiable so that for the typical sociopathic depopulationist local territory or domination is not sufficient for their wider world view. No, when our self-appointed elites are most out of balance, they “need” to dominate the earth, control all the resources and change the very genetic matrix of humanity forever. Consequences be damned.

The New York Times notes with apparent glee that the latest type of vaccine to emerge is one that intentionally acts as a genetic restructuring agent:

“Immunoprophylaxis by Gene Transfer, or I.G.T. — is underway, and several new ones are planned.”

“I.G.T. is altogether different from traditional vaccination. It is instead a form of gene therapy. Scientists isolate the genes that produce powerful antibodies against certain diseases and then synthesize artificial versions. The genes are placed into viruses and injected into human tissue, usually muscle.”

Here is the punchline: *“The viruses invade human cells with their DNA payloads, and the synthetic gene is incorporated into the recipient’s own DNA. If all goes well, the new genes instruct the cells to begin manufacturing powerful antibodies.”*¹⁶

As the New York Times crowed¹⁷ synthetic genes will be introduced by these vaccines to “protect against disease,” while simultaneously **changing the genetic makeup of humans**. [Emphasis added – Dr. Rima]

¹⁵ <https://vactruth.com/2014/12/10/tetanus-vaccines-cause-infertility/>

¹⁶ <https://jonrappoport.wordpress.com/2016/05/17/new-vaccines-will-permanently-alter-human-dna/>

If all goes well. And what could possibly go wrong?

The article says “*By delivering synthetic genes into the muscles of the [experimental] monkeys, the scientists are essentially re-engineering the animals to resist disease.*”

One has to ask whether they will be able to resist other things, such as obeying orders, fighting in meaningless wars of empire, working in dangerous conditions, etc.

Michael Farzan, an immunologist at Scripps and lead author of the research¹⁸ effort says,

“The first human trial based on this strategy — called immunoprophylaxis by gene transfer, or I.G.T. — is underway, and several new ones are planned.”^{19, 20, 21}

One must ask whether the humans having their genes experimentally transformed were volunteers or whether they did not know that their genetic make-up would be, like the Philippine, Nicaraguan, Guatemalan Thai, Kenyan and other women, involuntarily changed forever.

**How well do you think the Universal Right to Informed Consent
these women were guaranteed was respected?²²**

The authors make no bones about the intention and ability of the vaccine to permanently transform genes. By, oddly, they seem unconcerned that “I.G.T. is altogether different from traditional vaccination” with effects lasting, quite literally, as long as there is a human species on the planet (or off it).

Why is this “good news”? Because that has been the plan for a very long time and that having a genetically modified under-race ready and willing to serve the over race in all things has been in the works for a very long time? Could it be that the production of, say, a short, stupid microcephalic race of limited intelligence, but genetically engineered to be docile, servile and devoted, a race of what used to be humans, would serve these would-be rulers very well, indeed? Perhaps they could call them “Delta Workers”.²³

Just think: these subgroups probably would not be mutually fertile (would the sub-humans still be fertile at all?) and they surely would not be any romantic attraction to the young of the over class so there would be no pollution of the pure genes of the master race, nor would there be anything to raise the lowered status of the racial characteristics of the Delta Workers.

All in all, from a total domination point of view, it sounds ideal. Herr Doktor Mengele would have approved.

Natural Solutions Foundation
PRIVATE & CONFIDENTIAL

Of course, for you and me, those to be modified and subdued, it does not sound quite so ideal.

That is, in many ways, what this ebook is about.

Since Zika Virus and the deception around it is, it appears to me, intimately linked to the dominance of a few over the vast numbers of the many, and the elimination of many of those vast numbers for the benefit of the few, we must look beyond mosquitoes and syringes to understand the full picture. General Bert tells us that the truth is often hidden by the elites when it is something they do not want you to know. So read on to learn what they do not want you to know.

Rima E. Laibow, MD
May, 2016, Lo Barnechea, Chile

CHAPTER ONE

Cancer, Zika Vaccine, Polio, Guillan-Barre Syndrome and the Depopulation Agenda

ZIKA REGISTERED BY ROCKEFELLER FOUNDATION 1947

“The evidence is certainly mounting that Zika is a trigger for GBS.” (Guillan-Barre Syndrome)²⁴

THEY tell you that you need a **Zika Vaccine**, which Anthony Fauci (National Institute for Allergy and Infectious Disease) predicts will “be as common as a rubella vaccine”.²⁵

THEY tell you that they are working for your health, but WHO co-runs **Codex Alimentarius**²⁶, a food regulations system weaponizing food against your survival, although it knows that billions will die as a result.²⁷

THEY ignore the risks of vaccine-induced disease, not the least of which is cancer but which also includes Guillan-Barre Syndrome (GBS), polio’s new post-polio eradication name.

²⁴ <http://www.theguardian.com/world/2016/feb/29/zika-virus-scientists-evidence-guillain-barre-link>

²⁵ <http://www.foxnews.com/health/2016/05/06/getting-zika-shot-may-soon-be-new-normal.html>

²⁶ <http://www.fao.org/fao-who-codexalimentarius/standards/en/>

²⁷ www.whqlibdoc.who.int/trs/WHO_TRS_916.pdf

Polio is defined as an ascending, often asymmetrical paralysis caused by damage to the anterior horn cells of the spinal cord. GBS is defined as an auto immune attack on the myelin sheaths of the nerve cells. The paralysis may be either symmetrical or asymmetrical.^{28, 29}

According to the CDC, “In the United States, . . . an estimated 3,000 to 6,000 people develop GBS each year on average”.³⁰

If GBS is a cover-up name for polio, as I believe that it is, we have CDC saying that there are between 3 and 6 thousand victims in the US alone of a disease threat that has supposedly been eliminated long ago. But the world health organizations cannot afford to come clean on this issue when they have painted themselves into the following corner:

“Polio was once a disease feared worldwide, striking suddenly and paralyzing mainly children for life. WHO is a partner in the Global Polio Eradication Initiative, the largest private-public partnership for health, which has reduced polio by 99%. Polio now survives only among the world's poorest and most marginalized communities, where it stalks the most vulnerable children. The Initiative's goal is to reach every last child with polio vaccine and ensure a polio-free world for future generations.”³¹

The widespread appearance of GBS In fully vaccinated populations makes it clear that polio has not been eradicated. It has been politically exiled, but has managed to live in disguise and emerge with a new pedigree and identity.

In fact, GBS is nothing more than a wastebasket term for a host of neurological conditions which produce the same pathology. Medscape.com says that the following may cause, or be indistinguishable from, GBS:

- Acute myelopathy (e.g., from compression, transverse myelitis, vascular injury)
- Chronic inflammatory demyelinating polyneuropathy
- Conversion disorder/hysterical paralysis
- Human immunodeficiency virus (HIV) peripheral neuropathy
- Neurotoxic fish or shellfish poisoning
- Paraneoplastic neuropathy
- **Poliomyelitis***

²⁸ <http://www.differencebetween.com/difference-between-polio-and-vs-guillain-barre-syndrome/>

²⁹ www.yahoo.com/news/study-strengthens-suspected-between-zika-paralysis-205110751.html?ref=gs

³⁰ <http://www.cdc.gov/flu/protect/vaccine/guillainbarre.htm>

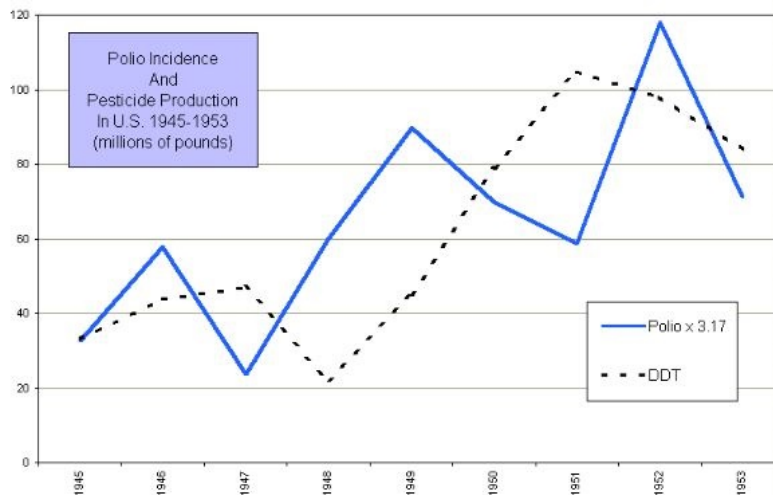

³¹ <http://www.who.int/features/factfiles/polio/en/>

- Porphyria polyneuropathy
- Spinal cord compression
- Spinal cord syndromes, particularly post infection
- Tick paralysis
- Toxic neuropathies (e.g., arsenic, thallium, organophosphates, lead)
- Vasculitic neuropathies
- Vitamin deficiency (e.g., vitamin B-12, folate, thiamine)
- West Nile encephalitis
- Bilateral strokes
- Acute cerebellar ataxia syndromes
- Posterior fossa structural lesion³² [Emphasis added – Rima E. Laibow, MD]

Thus, the polio/GBS clinical pictures are so similar as to make diagnostic distinction of one vs. the other condition virtually impossible except by response to gamma globulin (GBS sometimes responds to it, polio rarely does).

There are many who suspect that polio is actually a powerful immune reaction to a variety of assaults including vaccines, infections, strong toxins like DDT and other pesticides.³³

34

Among those powerful immune assaults is vaccination. ANY type of vaccination.

Please recall that no matter what state, province, prefecture or country you live in, so long as the nation in which you live has signed and ratified the Geneva Convention, **you have a legally protected right**

³² <http://emedicine.medscape.com/article/315632-differential>

³³ <http://www.westonaprice.org/health-topics/pesticides-and-polio-a-critique-of-scientific-literature/>

³⁴ Ibid.

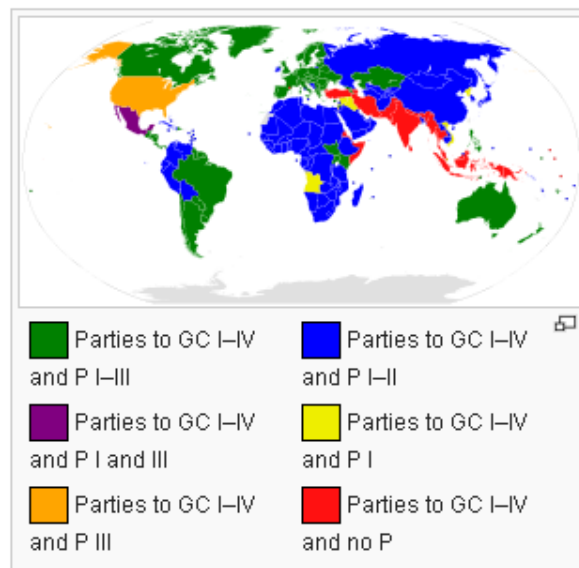

Natural Solutions Foundation
 ❧ PRIVATE & CONFIDENTIAL ❧

to absolute Informed Consent as long as you assert that right correctly. If you do not do so, you are considered to have waived that right.

The best way to assert your right to Informed Consent and refuse vaccines if that is your wish (and I strongly advise it) is to present an Advance Vaccine Directive Card with your name (or that of a child or other person you wish to protect) and the date that you signed it clearly written on the card.

Detailed instructions on how to use the Advance Vaccine Directive Card can be found here:
<http://www.DrRimaTruthReports.com/AdvanceVaccineDirective>.

Natural Solutions Foundation recommends that you and your loved ones secure an Advance Vaccine Directive Card to assert your legal right to refuse ANY vaccine through Informed Consent — <http://TinyURL.com/AVDCard> - **no matter what the local, state or national law says**, assuming you live in one of the 126 countries that have signed and ratified the Geneva Convention! Please see the following graph for the list of signatory countries to the Geneva Convention. Yours is probably among them. Any color on the graph indicates that your nation is required to implement and honor your Informed Consent rights.

As discussed above, GBS (Guillan-Barre Syndrome) is a serious neurological adverse event following vaccination. While GBS may be an unfamiliar term to most people, the older, better known name for the same thing is “Polio.”

Now that polio has been officially “eradicated,” the politically correct names for polio have been changed to either “Non Polio Acute Flaccid Paralysis” [i.e. polio which is polio but isn’t REALLY

³⁸ https://en.wikipedia.org/wiki/List_of_parties_to_the_Geneva_Conventions

polio because the authorities said it wasn't], or "Guillan-Barre syndrome (GBS)". Consider the following:

*"Guillan-Barre syndrome (GBS) is the most common cause of acute flaccid paralysis (AFP) in the post-poliomyelitis eradication era. This is the first study done to identify the epidemiology, clinical features, and outcome of GBS in Iraqi children over 15 years."*³⁹

Guillan-Barre Syndrome is not rare. In a ridiculous bid to pump the newest "Gonna-Kill-You-All-Plague-So-You-Gotta-Have-This-New-Vaccine", the long-known and absolutely innocuous Zika Virus has suddenly become the source of – wait for it --- Polio!

So while the absurdist lackeys have connected two things that do *not* go together: Zika and Gillan-Barre Syndrome, and since their scam du jour, Zika, must have a vaccine, they are telling us that Zika virus, despite a 69 year history of known innocuous behavior, has suddenly become a cause of polio.

Um, how, and more to the point, why, exactly, are we supposed to believe that? Based on what evidence?

Glad you asked! The level of scientific insanity being pumped out by the Zika team reaches new lows even for the vaccine folks!

A US Centers for Disease Control and Prevention study reported:

*"Researchers looked at 41 people in Brazil who developed the condition and found that nearly 90 percent of them had earlier suffered Zika-like symptoms, the Associated Press reported. However, the study authors noted that this was a small study and they **don't yet have blood test results that would show whether the patients were infected with Zika before developing Guillan-Barré.**"*⁴⁰ [Emphasis added – Dr. Rima]

Note that the GBS victims did not have blood work taken which could *show* the presence of the virus so the relationship is the merest of mere speculation⁴¹ despite the widespread trumpeting another of the "dangers" of contracting Zika virus.

The danger, in my view, is *not* from the virus but that, with the enthusiastic support of the worst elements of policy and science in our governmental and trans-governmental bodies, the vaccine makers will be wielding their syringes sooner rather than later.

You are being set up for a vaccine requirement that might:

- Chip you

³⁹ Jasem J, et. Al, Guillain-Barré syndrome as a cause of acute flaccid paralysis in Iraqi children: a result of 15 years of nation-wide study, *BMC Neurol.* 2013 Dec 10;13:195

⁴⁰ <http://www.neurologyadvisor.com/general-neurology/new-evidence-study-results-link-zika-virus-and-guillain-barr%C3%A9-syndrome/article/494902/>

⁴¹ [Ibid](#)

- Give you cancer
- Make you infertile
- Cause autism and other neurological disorders
- Damage your immune system
- Cause encephalopathy
- Damage your endocrine function
- Cause diabetes
- Cause GI damage
- Cripple you
- Kill you

This is a recipe for disaster.

But I have a better idea: Create a health regimen for yourself and family using protective non-toxic nutrients (CBD and Nano Silver 10 PPM⁴²), eat clean, organic food and take appropriate supplements like Astaxanthin, Fucoidan, Vitamins C and D3.

Most important, AVOID Vaccination.

I want that for you. You want that for you. They, the globalists, want you vaccinated, docile, sick and dead.

So here is what I propose:

[1] You and everyone you want to protect must have an Advance Vaccine Directive (AVD) card. I want you to have maximum protection with both my wonderful UPWARD™ CBD 1500mg Oil, UPWARD™ CBD Capsules and Nano Silver 10 PPM and the AVD card.

[2] Because I want to thank you for giving this ebook your time and attention, I want to give something back to you: I will make one vaccine exemption card available without cost as my gift to you for your purchase of any (or all) of these amazing health promotion products –

- **UPWARD CBD 1500 mg Oil**
- **UPWARD CBD 25 mg Capsules**
- **Nano Silver 10 PPM -**

That means that I will send you one complementary Advance Vaccine Directive card (\$30 value) so you can legally refuse ANY vaccine mandate. Enter the following code at the time of

⁴² Both available at www.NSFMarketplace.com

Natural Solutions Foundation
PRIVATE & CONFIDENTIAL

purchase: “FREEAVD” and we will send you, under separate cover, a free Advance Vaccine Directive card as our gift to you. That important link is www.NSFMarketplace.com. When you pay the shipping and handling cost of \$6 we will send you a free AVD card under separate cover from your other items.

Of course, additional AVD cards may be purchased as well to protect the other members of your family.

I want you to have an Advance Vaccine Directive in your wallet. I want your children to have them in their diaper bags or back packs. I want your mother and father to have one in their purse or wallet. The card will be mailed to you as our gift.⁴³

Informed consent and knowledge, along with access to our chosen health strategies are essential to freedom.

⁴³ We will ask you to pay \$6 to defray shipping and handling for your free Advance Vaccine Directive Card.

www.DrRimaRecommends.com

CHAPTER TWO

Avian Flu, Swine Flu, Ebola, MERS, SARS, Zika, Zika, Zika

Zika Virus... Or Something...Causes Nerve/Brain Damage?

A Word to the Wise: Nano Silver and CBD

www.NSFmarketplace.com

Margaret Chan, MD, Director General of the World Health Organization (WHO) announced grave concern over the Zika virus's claimed "explosive" spread saying that the danger was not only to pregnant women, but to all other adults as well.

The media has gone full hype into Zika as a cause for Guillan-Barre Syndrome (which is, for all practical purposes, just a new name for Polio) and Acute Disseminated Encephalomyelitis (an auto immune attack on the brain) in adults.

Of course, the lap dog CDC has dutifully licked the, er, fingers of Dr. Chan, obligingly declaring that Zika virus is present in not 12 US States, but 30 and sternly warning of the dangers to adults.

What dangers? Oddly, this previously widely spread and quite benign virus is suddenly associated with an auto immune condition in which the body attacks the brain (ADEM or Acute Disseminate Encephalomyelitis) leading to MS-like symptoms and Guillan-Barre syndrome (that other name for polio).

Unsurprisingly, these symptoms "coincidentally" happen to be the same as *vaccine adverse reactions*.

And, of course, *microcephaly*, conveniently forgetting that the US is home to about 2500 microcephalic newborns a year. Those cases are caused by *something...*

The spread of Zika virus

So now we have about a dozen companies hot on the trail to win the Zika Vaccine Bonanza Gold Medal! A new danger has emerged! YEA! But, oops!, it is not new. In fact, it was deposited with the ATCC registry by a Rockefeller Institute scientist in 1947.⁴⁵

⁴⁴ <http://www.economist.com/blogs/graphicdetail/2016/01/daily-chart-19>

⁴⁵ http://www.lgcstandards-atcc.org/products/all/VR-84.aspx?geo_country=es#generalinformation

Zika virus (ATCC[®] VR-84[™])

Classification: Flaviviridae, Flavivirus / Product Format: freeze-dried

GENERAL INFORMATION	CHARACTERISTICS	CULTURE METHOD	SPECIFICATIONS	HISTORY
Name of Depositor J. Casals, Rockefeller Foundation				
Source Blood from experimental forest sentinel rhesus monkey, Uganda, 1947				
Year of Origin 1947				
References Dick GW, Kitchen SF, and Haddow AJ. Zika Virus. I. Isolations and Serological Specificity. Trans R Soc Trop Med Hyg 46: 509-520, 1952. PubMed: 12995440 Zhu Z, et al. Comparative genomic analysis of pre-epidemic and epidemic Zika virus strains for virological factors potentially associated with the rapidly expanding epidemic. Emerg Microbes Infect 5: e22, 2016.				

**How Much Money Would You Have to Spend For Your Own Supply of Zika?
Not a Whole Lot, As it Turns Out:**

Zika virus

ATCC[®] VR-84[™]

freeze-dried

For-Profit: **\$516.00**

Non-Profit: **\$430.00**

Qty:

Add to Cart

Zika is considered so nonthreatening, only a Biosafety Level 2 material, that it is available by mail for not very much money at all. And the purchaser merely has to promise to take the necessary precautions once they receive it, whatever the purchaser might think that means.

Pretty hazardous stuff, right?

What is a Biosafety Level 2 material?

Classification	Flaviviridae, Flavivirus
Agent	Zika virus
Strain	MR 766 (Original)
Biosafety Level	2
<i>Biosafety classification is based on <u>U.S. Public Health Service Guidelines</u>, it is the responsibility of the customer to ensure that their facilities comply with biosafety regulations for their own country.</i>	

Now, we can be pretty sure that

- **Zika (2016) is the next**
- **MERS (2012) which was the next**
- **Swine Flu Ver.2.0 (2009) which was the next**
- **Bird Flu (2003; 2012) which was the next**
- **SARS (2002) which was the next**
- **Swine Flu Ver.1.0 (1976)**

Each is a genetically engineered plague designed to terrify you into getting a vaccine of both very serious known and deeply concerning unknown dangers. But it designed to do more than that.

My analysis and the documentation that I and others have found indicates clearly that *vaccines*—

1. Cause both acute (adverse reactions) and chronic diseases⁴⁶
2. Impact fertility negatively^{47, 48, 49, 50}
3. May very well introduce intentionally damaging substances such as **nagalase**⁵¹, chips and

⁴⁶ Vaccine adverse reactions are not rare: <http://drrimatruthreports.com/dr-rima-replies-do-the-math-vaccine-adverse-reactions-are-not-rare/>

 ❧ PRIVATE & CONFIDENTIAL ❧

undeclared mercury into the body of the recipient.

So the trajectory is set: I predict that just as with the genetically engineered and intentionally disseminated Swine Flu, WHO will declare a Level 6 Pandemic and the US and other nations will leap into action, declaring mandatory vaccination programs a necessity to protect us all from dire consequences and to protect the unvaccinated (of whom there will be precious few!)

You'll recall that last time, 2009, when a "health emergency" "spontaneously" presented itself, Kathleen Sibelius, the then-head of Health and Human Services, announced to Congress on September 15 of that year that FDA had already approved untested vaccines "against" Swine Flu (H5N1) and that they had further purchased the entire output of 5 vaccine manufacturers to inoculate the entire country **WHETHER THEY WANTED TO BE VACCINATED OR NOT, STARTING WITH THE ONES WHO WANTED IT.**

The purchased vaccines, by the way, were never tested for either safety or efficacy as required by US law.

Further, since there was allegedly "not enough antigen to go around" the FDA had also purchased roughly a half billion \$US worth of the unapproved oil adjuvant, squalene, to inject along with the supposedly scarce adjuvant. That way, everyone would "be protected".

From fertility. You see, the amount of squalene that was to be added to the already ineffective and dangerous vaccine was the same as that which two US patents have shown causes irreversible infertility and sterility.

Noting that the FDA scientists would not "sign off" on this dangerous idea, she said that the FDA planned to go ahead and put this material in the vaccine doses anyway.

In the MANDATED vaccine doses.

How did that program get dropped? Because we asked YOU to use an Action Item like this:

<http://TinyURL.com/VaccinationISViolation>

Your outrage, expressed in 5.3 million emails, ground the machine to a halt in just 11 days.

The US simply abandoned the program. What became of the half a billion dollars of dangerous squalene? That remains a mystery.

What is sure, however, is that *you* did stop their madness through your activism and that we need to continue this kind of pressure.

We said at the time that we had won a victory, but that they would be back.

What is also sure is that while we stopped them, we only slowed them down and they *ARE* back.

There WILL be a Zika virus panic and another “Level 6”. And they WILL try to arrange a mandate as a marketing strategy (and who knows what else).

You see, it is clear to us here at Natural Solutions that the unaltered, non-GMO Zika Virus does not kill or harm anyone but that the new, improved, modified one, perhaps the one delivered by the genetically modified virus that I suspect is circulating (and probably is what the Oxitech’s GMO mosquitos are injecting) is there to create another plague.

You really, really need Nano Silver 10 PPM. And you need it on hand for whatever they throw at you next.

It enhances normal immune function so well that, well, other antibiotics and anti-virals are not necessary. Vaccines, of course, are not only not necessary but to-be-avoided-at-all-costs.

So what do you do when the bacteria and viruses come knocking? You whip out your bottle of [Dr. Rima Recommends™ Nano Silver 10 PPM](#) and you take a teaspoon full (which, conveniently, is the same as a capful). You can do that once, twice or even more a day because there is no residue build up in the body. Studies show that it is completely excreted within 24 hours so you cannot turn blue.

You can, however, turn healthy.

Natural Solutions Foundation
PRIVATE & CONFIDENTIAL

So can your kids, your pets, your children and anyone else you care about because unlike antibiotics, my Nano Silver 10 PPM cannot cause resistant organisms. Not only that, unlike antibiotics, it actually leaves the beneficial bacteria and healthy cells untouched in any way. Of course, FDA has been trying to get rid of silver for decades. It just won't go away! In fact, FDA has been forced to reluctantly approve it for use as a safe, non-toxic surface cleaner in food areas, hospitals, a wound treatment, certify it as a hand sanitizer, approve it in burn and surgical dressings and sanitizers, recognize it as a nutrient, etc. Poor FDA. Lucky US!

And it is, as I see it, the solution to the plagues, genetically engineered or not, which are being brought down upon our heads:

- Zika Virus
- Dengue Fever
- Chikungunya
- Ebola Virus
- Measles
- Mumps
- Rubella
- Smallpox
- Chickenpox
- Hepatitis A, B, C, E
- Meningitis and on and on and on and on...

This is urgent. Get your Dr. Rima Recommends Nano Silver 10 PPM now before our supplies run out. You'll find it here: www.NSFmarketplace.com

Natural Solutions Foundation
PRIVATE & CONFIDENTIAL

One other thing: the discomforts of these and other diseases and conditions occur in large measure because of the inflammatory and cytokine response of the body to the invader. It turns out that both THC and CBD each have a powerful, but absolutely opposite, impact on the immune system: THC suppresses it while CBD enhances it.

That means that while you are protecting yourself by supporting your immune function, you also want to down-regulate the inflammatory response by enhancing your CBD levels.

For that, you'll need to supplement your body's own CBD to make sure that you are covering all the biological bases no matter what they throw at us!

To help prepare for any eventuality, you need CBD in either our great high potency UPWARD CBD 1500 mg infused nutritive Organic Hemp Seed oil or our brand new UPWARD CBD 25 mg Capsules with **Astaxanthin** and an all-natural "secret ingredient" to enhance absorption up to 300%! That means you may get the benefits of three times as much CBD without paying for it!

Support your health here: www.NSFMarketplace.com

Remember that when you support your health this way, you support your health freedom as well by supporting Natural Solutions Foundation.

PS: Did you know that after inflammation sets in, your body makes more receptors that can use CBD? But what if your body needs more CBD than it can supply? You'll need to supplement that vital substance. And that is just what our UPWARD family of pure CBD products is designed to do. Obtain your clean, non-solvent produced CBDs here: www.NSFmarketplace.com.

NOTE: While we do not adopt any implication in any government sponsored publication that CBD is not a DSHEA-grandfathered dietary ingredient, there is some interesting information

here: <http://www.ncbi.nlm.nih.gov/pmc/articles/PMC2828614/> which we interpret to be about how CBDs support normal inflammatory response.

CHAPTER THREE

Is Pertussis Vax to Blame for “Zika Birth Defects”? **There Is No Justification for Whooping Cough Vax During Pregnancy** Take Action NOW!

Australia <http://tinyurl.com/NoForcedVaxAustralia>

USA: <http://tinyurl.com/VaccinationisViolation>

A video⁵² is circulating on the internet of “Cormit”, a very tired, sad Australian “mom” holding her “baby” saying she refused vaccination against Pertussis when she was pregnant and now her baby is very, very sick with that very disease so everyone should get vaccinated, including pregnant women.

It is sad to see a mom suffering and hear about the struggles of her little one and, of course, I wish both of them well. That is, I wish them well if they are really a mom and a baby. I have my doubts. In fact, I believe the mom is an actress and the baby is doll.

There are some problems, you see, with the story, the video and the recommendation for vaccination in pregnancy including the fact **that for better than 2 minutes and 53 seconds the “baby” does not**

⁵²<http://www.sbs.com.au/news/article/2016/04/05/queensland-mums-warning-after-refusing-whooping-cough-vax>

take a single breath. Now, as it happens, most babies do breathe once in a while, especially babies with life-threatening respiratory diseases.

Not this one. Nope. She lies there as if she is a just a terry cloth onsie on, oh, perhaps a doll. Mmmm. Serious problem with the video. But the story is even fishier.

First, the disease itself has been modified by generalized vaccination so that pertussis is now more virulent and strikes younger children like the little supposed “baby” here.

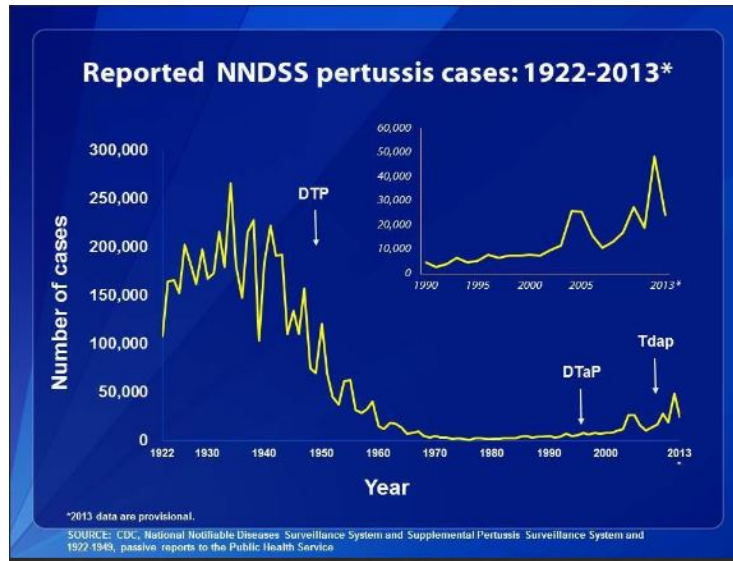

Unvaccinated populations have a far less serious version of the condition than vaccinated ones so that the unproven, but much vaunted, theory of herd immunity could actually be said to be working in reverse here. It was for this reason that Sweden terminated its pertussis vaccination program since it was NOT providing protection but was modifying the characteristics of the disease and causing deaths in young children.⁵³

Second, pertussis vaccinations are unapproved and untested for either safety or reproductive future of the mother or to the child when used in pregnant women. What we do know is that the widely known outbreak of microcephaly attributed to Zika Virus, patented in 1947 by the Rockefeller Institute, and known around the world since that time was NOT caused by that virus.

All of the Brazilian women who gave birth to those damaged children had been vaccinated “against” pertussis by their 22nd week of pregnancy by edict of the Brazilian government despite that vaccine never having been found safe for either mother or child.

Third, the vaccines are ineffective against pertussis.

⁵³ <http://www.tandfonline.com/doi/pdf/10.1586/erv.09.88>

54

The statistics are dreadful: for example, **when South Korea made pertussis vaccination mandatory and achieved a 94% coverage rate**^{55 56},

Country	Pertussis vaccines available	Vaccine trade name (number of pertussis components), Manufacturer	DTP3 coverage
South Korea ^a	DTaP, Tdap (private sector), Tdap+IPV (private sector)	ADACEL [5], Sanofi Pasteur; BOOSTRIX [3], GSK; INFANRIX [3], GSK; KINRIX [3], GSK; TETRAXIM [2], Sanofi Pasteur Local production Biken DTaP [2], Boryeong; Kaketsuken DTaP [2], LG Life Sciences	94%

deaths from that disease in babies less than 1 year rose some 1300% – in a fully vaccinated population.⁵⁷

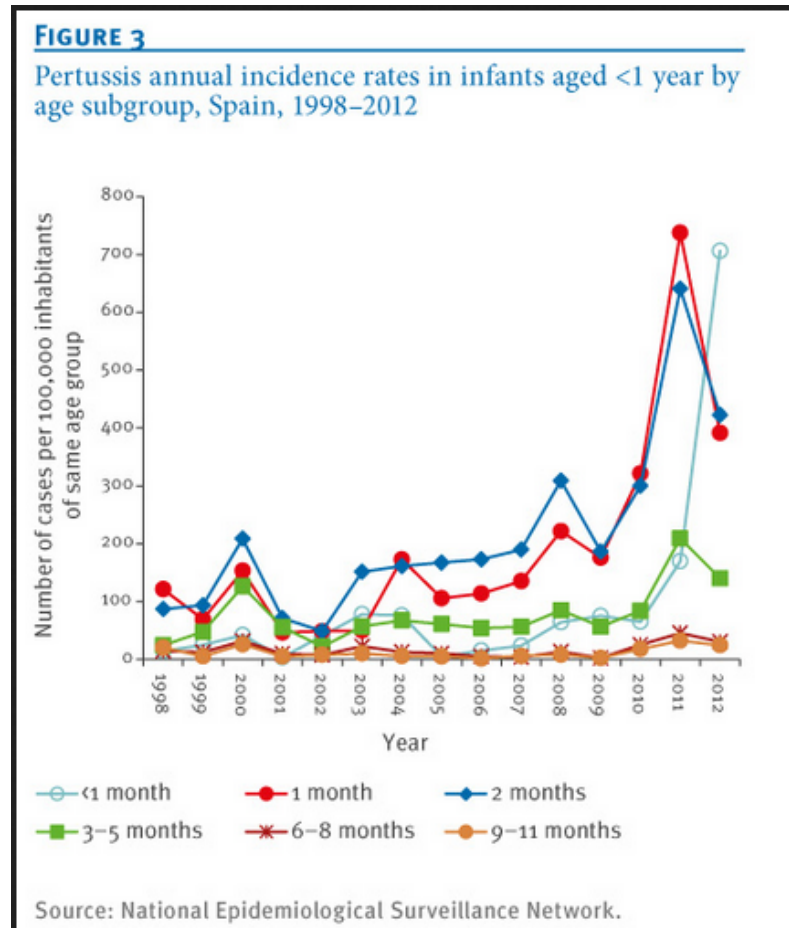

In Spain, with a 95% vaccination rate for a number of years, the incidence of Pertussis in infants has skyrocketed.

⁵⁴ <http://www.fondation-merieux.org/documents/en/conference-resources/apac-2015/kevin-forsyth.pdf>

⁵⁵ <http://www.tm.mahidol.ac.th/seameo/2012-43-3/19-5508-26.pdf>

⁵⁶ <http://www.tm.mahidol.ac.th/seameo/2012-43-3/19-5508-26.pdf>

⁵⁷ Ibid.

58

Where “Between 1998 and 2012, the incidence increased from 14.5 to 706.1/100,000 infants aged <1 month; from 121.3 to 391.8/100,000 infants aged 1 month; from 86.6 to 422.6/100,000 infants aged 2 months; from 24.4 to 140.4/100,000 infants aged 3–5 months; from 14.8 to 30.6/100,000 infants aged 6–8 months; and from 20.5 to 24.6/100,000 infants aged 9–11 months.”⁵⁹

In fact, vaccination coverage in Spain for pertussis is very high: “Vaccination coverage in Spain increased progressively during 1982 to 2012 and since 1998 has remained above 95% for the three basic doses.⁶⁰ Vaccination coverage for the four-dose schedule has been between 93% and 95% since 1996, and for the five-dose schedule has remained around 80–90% since 2001.”⁶¹

⁵⁸ <http://www.eurosurveillance.org/ViewArticle.aspx?ArticleId=20875>

⁵⁹ Ibid.

Ministerio de Sanidad, Servicios Sociales e Igualdad; 2013. Spanish. Available from:

<http://www.msssi.gob.es/profesionales/saludPublica/prevPromocion/vacunaciones/docs/TosFerina.pdf>

⁶¹ Ibid.

Fourth, the vaccine itself is highly toxic, containing, as it does, aluminum, foreign proteins of several sorts and a host of neuro and organ toxic materials.

Here are the ingredients in Pertussis vaccines. Ask yourself if they sound like something you want to inject into a pregnant woman or a baby or your own body:⁶²

DTaP (Daptacel)

Aluminum Phosphate, Ammonium Sulfate, Casamino Acid,
Dimethyl-beta-cyclodextrin, Formaldehyde or Formalin, Glutaraldehyde,
2-Phenoxyethanol

DTaP (Infanrix)

Aluminum Hydroxide, Bovine Extract, Formaldehyde or Formalin,
Glutaraldehyde, 2-Phenoxyethanol, Polysorbate 80

DTaP (Tripedia)

Aluminum Potassium Sulfate, Ammonium Sulfate, Bovine Extract,
Formaldehyde or Formalin, Gelatin, Polysorbate 80, Sodium Phosphate,
Thimerosal*

DTaP/Hib (TriHIBit)

Aluminum Potassium Sulfate, Ammonium Sulfate, Bovine Extract,
Formaldehyde or Formalin, Gelatin, Polysorbate 80, Sucrose, Thimerosal*

DTaP-IPV (Kinrix)

Aluminum Hydroxide, Bovine Extract, Formaldehyde, Lactalbumin
Hydrolysate, Monkey Kidney Tissue, Neomycin Sulfate, Polymyxin B,
Polysorbate 80

DTaP-HepB-IPV (Pediarix)

Aluminum Hydroxide, Aluminum Phosphate, Bovine Protein, Lactalbumin
Hydrolysate, Formaldehyde or Formalin, Glutaraldehyde, Monkey Kidney Tissue,
Neomycin, 2-Phenoxyethanol, Polymyxin B, Polysorbate 80, Yeast Protein

DtaP-IPV/Hib (Pentacel)

Aluminum Phosphate, Bovine Serum Albumin, Formaldehyde, Glutaraldehyde,
MRC-5 DNA and Cellular Protein, Neomycin, Polymyxin B Sulfate, Polysorbate
80, 2-Phenoxyethanol.

Fifth, serious complications from the vaccine are not, as presented, rare. They are quite common and, if you consider the metal, excitons, sterilizes, formaldehyde and other components, the logic of injecting these materials directly into the body, bypassing the natural immune protective barriers of

⁶² <http://vaxtruth.org/2011/08/vaccine-ingredients/>

Natural Solutions Foundation
❧ PRIVATE & CONFIDENTIAL ❧

lungs, mucosa and gut is absent while the dangers are obvious.

Sixth, the supposed immunity conferred by the pertussis vaccine is mythical at best. Whenever a vaccine fails, the vaccine-driven regulators recommend booster shots which are good for business, bad for the body and brain and absolute rubbish scientifically since they have never been shown to provide any additional protection against disease.⁶³

Additionally, most cases of measles, pertussis and other “preventable” disease occur in the vaccinated and the recently vaccinated because they shed viral diseases like measles, chicken pox and similar. While B. pertussis is not a viral disease, its morbidity and mortality has been increased, not decreased, by the general vaccination program.

“Cormit”, the supposed mom of the supposed baby who now has Whooping Cough but was not vaccinated when she was in utero, is, in my opinion, nothing but a fraud perpetrated by the Gold Coast (Australia) Department of Health.⁶⁴ The immune system of this “bulletproof woman” would have been compromised and so would that of her baby by vaccination.

There are effective, non-toxic means of treating and preventing infectious diseases. Had the mom in this sad video given her baby a 1/2 teaspoon of Nano Silver 10 ppm and taken a full teaspoon full for herself once or twice a day, the video would not have needed to be made and we would not watch a tired, worried mom hold her tired sick baby because both would be fine.

Neither, of course, would be pushing money into the hands of the vaccine makers eager for it or control into the hands of a government even more eager for it.

So get well, baby, and get real, government. Pertussis vaccine is just one of many horrifying interventions that have no place in medicine.

⁶³ <https://www.sott.net/article/283387-Why-vaccines-spread-disease-and-vaccine-science-is-flawed>

⁶⁴ <http://www.parenting.com/news-break/mom-regrets-skipping-whooping-cough-vaccine-after-baby-hospitalized>

CHAPTER FOUR
Brazil Bans Monsanto (Sort Of)
Birth Defect Chemical – or Is It Zika?
ZIKA MAY NOT BE THE CULPRIT!

Brazil has banned the use of Pyriproxyfen, marketed there as SumiLarv™ by the Japanese Monsanto subsidiary, Sumitomo, because of its *suspected* association with microcephaly.* Or maybe just one state, Rio Grande do Sul, did. Recently Joao Gabbardo dos Reis, Secretary of Health for Rio Grande do Sul, announced that the use of the larvicide to treat water used for human consumption is now prohibited.⁶⁵

So, is it this toxin, or that toxin, or even the Zika virus, that’s the birth defect generator?

“We decided to suspend the use of the product [Pyriproxyfen] in human consumption water until we get a position in the Ministry of Health and because of that we strengthen the appeal to the population to eliminate any possible breeding ground of the mosquito,” said Gabbardo said.⁶⁶

Despite initial announcements that Brazil had banned this dangerous chemical, which is one of 12 recommended by WHO for controlling mosquito larvae to be sprayed directly into the drinking water of people, Brizil apparently did not do so. We would have to ask “Why not?”

CNN reports “Brazilian health officials and the World Health Organization are denying links between a well-known pesticide and microcephaly, a condition that causes babies to develop abnormally small heads and leads to death in some cases.” and “unlike the relationship between the Zika virus and microcephaly, which has had its confirmation attested in tests that indicated the presence of the virus in samples of blood, tissue and amniotic fluid, the association between the use of Pyriproxyfen and microcephaly has no scientific basis.”

Confirmed? In less than 10% of either the mother’s or the baby and found in approximately the same percentage of the general population in that area?

Once again, we are experiencing a “Science is settled” moment where lies and conflicted interests are

⁶⁵ <http://truthkings.com/2016/02/17/brazil-bans-monsanto-pesticide-after-its-exposed-to-cause-birth-defects/>

⁶⁶ <http://www.wapt.com/health/brazil-who-officials-deny-pesticidemicrocephaly-link/38034080>

Natural Solutions Foundation
 PRIVATE & CONFIDENTIAL

passed off as science with truth sold to the highest bidder. Let me repeat: the presence of Zika virus has been found in less than 10% of the afflicted babies and their mothers. So much for causation. We do not even have correlation here, much less causation.

But way back in March, 2014, Brazil's Federal Public Prosecutor asked the country's justice department to suspend the use of glyphosate, which is the active ingredient in Monsanto's Roundup®—the world's top-selling herbicide. In addition, the prosecutor has also targeted another herbicide known as 2,4-D (a component of Agent Orange) and the active ingredients methyl parathion, lactofem, phorate, carbofuran, abamectin, tiram and paraquat, all of which are highly toxic to humans and the environment.

The consequences of such the prosecutor's act were far reaching: Since crops are genetically modified to accept these poisons, the prosecutor asked that the National Biosafety Technical Commission prohibit the widespread sale of GMO seeds resistant to the herbicide pending a final position by ANVISA.

The news came as a huge blow to the biotech industry, following a unanimous ruling by Brazil's Federal Appeals Court the week before canceling the cultivation of Bayer's Liberty Link GM Maize.

In that same time frame, Sri Lanka ordered a ban on glyphosate due to concerns the chemical may be linked to a mysterious kidney disease that has killed thousands of agricultural workers and the legislature in El Salvador approved a ban on dozens of agrochemicals including glyphosate.

The bans have not been enforced and more chemicals are added frequently creating a toxic stew in which living organisms cannot tolerate and survive.

Since the government of Brazil and their friends over at WHO maintain that there is no science behind the possibility that pyriproxyfen is the cause of the tragic and enormous microcephaly outbreak, but that Zika virus is, let's take a moment to look at the evidence.

- **Is there a microcephaly outbreak in Brazil?** (Actually, no, there isn't despite the absurd hysterical GET ME A VACCINE NOW!!!! WHO/US/Media hype).
- **Are there 4600 cases of microcephaly?** (Actually, no there are approximately only 17 possible cases that “have a relationship to Zika virus” out of about 350 total suspected cases of “microcephaly and related conditions”, whatever having “a relationship to the Zika virus” actually means.)
- **Do the afflicted babies or their mothers have Zika Virus?** (Actually, fewer than 10% of babies and mothers are Zika positive out of all those with suspected or confirmed microcephaly.)
- **Is Zika virus the cause of the cases or is it a benign, minor virus which does not cause birth defects?** (Actually, no it is not since in the 70 years since it was identified and patented by the Rockefeller Institute, it has been identified all over the world, but never associated with anything other than a mild flu-like illness.)
- **Does Sumilarv(TM). Monsanto affiliate's name for pyriproxyfen, a poison applied to drinking water in order to cause birth defects and deformities in mosquito larvae, cause**

Natural Solutions Foundation
 ❧ PRIVATE & CONFIDENTIAL ❧

microcephaly? (Actually, *yes it does* according to Physicians in the Crop-Sprayed Towns (PCST), a group of Argentinian doctors.⁶⁷)

- **Is GSK's TDaP vaccine, mandated for every pregnant woman in Brazil before 22 weeks of gestation, but never tested in pregnant women for reproductive or fetal safety, a likely candidate for the deformities?** (Actually, *yes it is* because it contains aluminum plus other highly inflammatory and damaging compounds and contaminants.)
- **Could a combination of dangerous vaccines and dangerous agrochemicals (including all the others dumped in huge quantities into the environment) act synergistically to damage the fetus in both easily observed and more subtle ways seen years or decades later?** (Actually, *yes they could and yes they do*: Roundup(R) or glyphosate, for example, in addition to causing infertility, cancer, and a host of other horrifying conditions, causes birth defects. So does 2,4-D, another Monsanto gift to the world, and numerous other chemicals used without restraint or sense, just as vaccines are.)
- **Will adding a Zika vaccine protect any mothers or babies from microcephaly?** (Actually **no, not a one.**)

Brazil's Health Minister, Marcelo Castro is quoted as saying he has "100% certainty" that there is a link between Zika and microcephaly. Certain physicians and scientists in the global medical community support this, including the US's influential Center for Disease Control. Other researchers say there is no hard evidence of the link, but just some epidemiological indications and circumstantial evidence.

One paper by A S Oliveira Melo et al, published in the journal *Ultrasound in Obstetrics & Gynecology*⁶⁸, identified Zika virus in the amniotic fluids and other tissues of the some affected babies and their mothers. However, **only two women were examined, considered by scientists too small a number to establish a statistically significant link.** [Emphasis added – Dr. Rima]

On February 3, 2016 the New York Times reported on the results of analyses by Brazil's Health Ministry. The Ministry stated, "Of the cases examined so far, 404 have been confirmed as having microcephaly. Only 17 of them tested positive for the Zika virus..."⁶⁹

Colombia's president, Juan Manuel Santos, as reported by the Washington Post stated that public health officials have so far diagnosed 3,177 pregnant women with the Zika virus- but in no case had microcephaly been observed in the fetus.⁷⁰

But what a Zika vaccine, now being rushed to market by at least 12 agencies and companies, including the US NIH, will do is give vaccine manufacturers another chance to make an

April 13, 2016 CDC Declares Zika Virus the “first mosquito-carried virus in human history to (sic) cause birth defects...”⁷² To quote CNBC’s report today on the CDC declaration. Note that the CDC has also opined that Zika virus is very mild with 80% of its victims never having any symptoms at all and the 20% who do show symptoms may have a slight case of the flue and perhaps a mild rash. **All of the exposed persons, says CDC, develop long lasting immunity. In other words, this mild, innocuous or invisible disease is not only self-limiting, but it is self-immunizing.**⁷³

“Any alleged link between the Zika Virus and the horrendous outbreak of microcephaly in Brazil may very well be part of a vaccine damage cover-up. The allegation of a Zika-birth defect link is neither a proper logical nor legal basis for the WHO Global Health Emergency Declaration.

⁷² <http://www.usatoday.com/story/news/2016/04/13/cdc-evidence-definitively-shows-zika-causes-birth-defects/82990834/>

⁷³ <http://www.opensourcetruth.com/2016/05/30/cdc-admits/>

Natural Solutions Foundation
 ❧ PRIVATE & CONFIDENTIAL ❧

Rather, the best evidence is that the Rockefeller Institute's proprietary Zika Virus does not cause birth defects like microcephaly but aluminum in vaccines and toxic chemicals like Roundup® can, and do, for example, in Brazil. But the failed GMO mosquitoes which are spreading the closely related Dengue and Zika viruses have given the pro-vax loonies a magnificent excuse to “protect” us from our health and from our freedom.” General Bert

Get ready for the battle of your life. It's called “Protecting Our Vulnerable Babies from Zika” and it is pure, unadulterated, but very dangerous, BS.

If we don't push back successfully now, they win. If they win, we lose – BIG TIME. Our health, our freedom and our genes will be damaged, perhaps beyond repair. Which is precisely the intent of this vicious and deceitful program to which we are being subjected.

I am a Major General trained in military intelligence and I see the forces arrayed against us with the obvious Order of Battle clearly visible.

By *scaring the wits* out of the population, they believe that we will blindly accept their solution – MORE vaccines delivered by mandate AND more GMO mosquitoes. They are behaving like health control terrorists pushing their vaccine weapons.

Through those vaccines, of course, they can put anything at all that they chose including sterilizing agents (as they planned to do in 2009), chips (both emitters and receivers), heavy metals, foreign DNA, including novel or “time bomb” material, highly toxic oil adjuvants like squalene, and whatever else their evil brains can devise. And you have to give them credit: they are very, very clever — very wicked.

More details on the Zika Virus Hoax from Rima E. Laibow, MD, the Medical Director of the Foundation, here: <http://drrimatruthreports.com/zika-global-health-emergency/>

**Here We the People stand.
 We do not accept.
 We do not agree and we most certainly do not acquiesce.**

There are 4 simple steps we MUST take now, and in massive numbers. Here they are.

First, PERSONAL protection: Assert your legally protected right to Informed Consent – your Right of Informed Refusal — for yourself and the people you care about by securing an Advance Vaccine Directive card here: <http://TinyURL.com/StopVaxMandates>. That's a donation site where you can

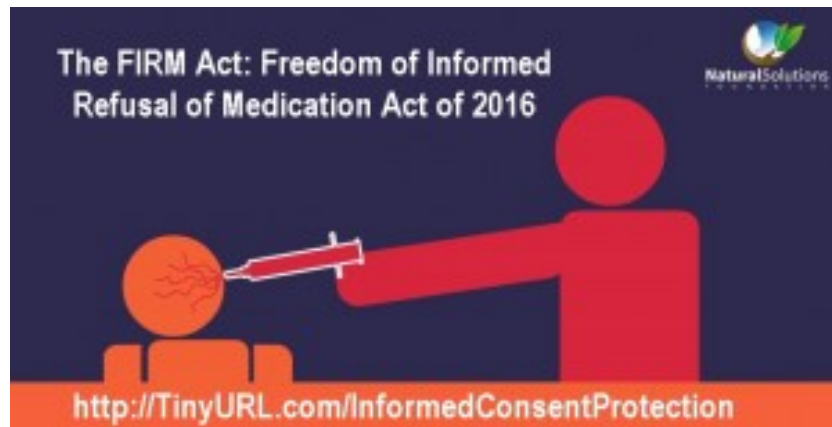

Natural Solutions Foundation
 ❧ PRIVATE & CONFIDENTIAL ❧

make a donation to help us win this huge battle and get your AVD cards or other Thank You gifts at the same time. Remember, we have a \$100,000 matching grant waiting to add to the kitty as soon as we meet our goal!

Second, POUND your legislators here: <http://tinyurl.com/vaccination/Sviolation>

Notify them that you *reject* all vaccine mandates. Right now, states like Hawaii and Virginia are considering legislation to, in Hawaii, make every vaccine *recommended* by the totally corrupt CDC a *required* mandate. Zika vaccine will be in that group very quickly along with more than 90 others for adults that are currently “recommended”.

Third, DEMAND Legislative Protection by passing the **FIRM Act** (Freedom of Informed Refusal of Medications Act) here: <http://tinyurl.com/InformedConsentProtection>.

This pointed legislation affirms your right to Informed Consent. We need to bring the issue to public and legislative attention and, for once and for all, memorialize, enshrine, articulate and punctuate the fact that your body does *not* belong to the State or its merged twin, the Corporation.

Fourth, Alert, Inform and Support your friends and colleagues by bringing them into this battle. Like and Share us on FB:/NaturalSolutionsFoundation and follow and share @DrRimaLaibow and @HealthFreedom. Urge them to download our free, massive vaccine truth program, the Mayday Marathon here: <http://TinyURL.com/MaydayMarathon> which will also bring them our newsletter. Download our Health Freedom App – go to your smart device’s App Store and search *healthfreedom* (as one word).

Ten minutes... Ten minutes! I am asking for a commitment from you to spend just 10 minutes per day on this issue and reach out to just 10 people per day whom you mobilize to do the same.

That’s all. 10 minutes of your busy life to save your life.

Do your part to share these solutions: <http://drrimatruthreports.com/?p=27640>

Yours in health and freedom,

Gen. Bert

CHAPTER SIX

Zika Gets a Bad Rap: New Killer DTaP Vaccine to Blame?

www.NSFmarketplace.com

Recently on the social media I saw a posting suggesting that the terrible Zika virus outbreak in Brazil was triggered by another GMO mosquito experiment. The posters noted an article from last July⁷⁴ where Oxitec announced: “Releases of the genetically engineered Oxitec mosquito, commonly known as ‘Friendly Aedes Aegyptus’, reduced the dengue mosquito population in an area of Juazeiro, Brazil by 95%, well below the modeled threshold for epidemic disease transmission.”

A shocking and, I think, correct re-examination of the Zika Virus causing 2400 Brazilian babies to be born with a dreadful and potentially deadly deformation called “Microcephaly” (literally ‘tiny head’) suggests that the mosquito story is nothing more than a deceitful cover story to hide the fact that a new DTaP vaccine, which women in Latin America are urged to get before they are 22 weeks pregnant, is the real cause of this horrible deformity.⁷⁵

**Were These Microcephalic Children
Injured Like the Brazilian Babies?**

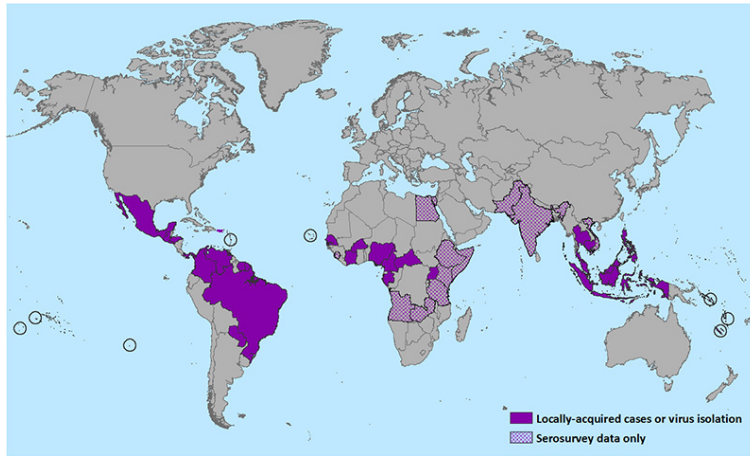

The critique points out, among other things, that some of the news articles are predated, indicating clear premeditation and that the natural life cycle of the mosquito makes it impossible for the disease to have spread in just 6 months over such a vast range.

⁷⁴ <http://www.oxitec.com/press-release-oxitec-mosquito-works-to-control-aedes-aegypti-in-dengue-hotspo/>

⁷⁵ <http://drrimatruthreports.com/zika-global-health-emergency/>

Natural Solutions Foundation
PRIVATE & CONFIDENTIAL

Most damningly, however, is the fact that the Zika virus has been known to infect people in Africa, South and Central America and Asia for more than 70 years without causing a single birth defect.

The new GSL TDaP vaccine, however, was introduced, by mandate, to the wombs in which the babies were growing just in time to account for the Brazilian deformities.

The solution? Avoid vaccines. How? Assert your Informed Consent Rights. Find out how here: www.DrRimaTruthReports.com/AdvanceVaccineDirective.

And, to make sure that you don't come down with Zika or any other virus, support your immune system with Nano Silver 10 PPM — www.NSFmarketplace.com — share this message with this link: <http://drrimatruthreports.com/?p=27510>

And by the way, the same GMO mosquitos have been released in Belize and Florida.

Dr. Rima Says, **“Here’s What I Would Do If I Had Cancer.”**

“In industrialized societies, cancer is second only to cardiovascular disease as a cause of death. But in ancient times, it was extremely rare. There is nothing in the natural environment that can cause cancer. So it has to be a man-made disease, down to pollution and changes to our diet and lifestyle.”⁷⁶

~ Professor Rosalie David
Manchester University's Faculty of Life Sciences

Cancer is almost completely a man-made scourge.

Our ancestors were not exposed to the range of Genomicidal (i.e., toxic or lethal to our genetic material, our DNA) toxins to which we are exposed. They were not vaccinated. They did not ingest, breathe, wear, cook in, store food in, toxic metals and plastics. Their food did not contain agrochemicals and was not grown with synthetic fertilizers. Their world did not contain anything intentionally genetically modified.

They rarely developed cancer. I wish the same were true for us.

This eBook, details some of the many connections among the “chronic, preventable diseases of under and mal-nutrition”⁷⁷ that include cancer and world depopulation. As Natural Solutions Foundation President, Maj. Gen. Bert Stubblebine III (US Army, Ret.), wrote late in 2015, even the “most privileged” cohort of Americans is losing the longevity race.⁷⁸

One vaccine after another has turned out to be “contaminated” with cancer causing viruses and other

⁷⁶ <http://www.medicalnewstoday.com/articles/204809.php>

⁷⁷ <http://www.who.int/dietphysicalactivity/publications/trs916/summary/en/>

⁷⁸ <http://drrimatruthreports.com/the-great-culling-tipping-point/>

particles. Each time, public [ill] health agencies *knew* about it for *years* before they confirmed it to the public. **Why would the Zika vaccine, a dangerous addition to a deadly line up, be any different?**

However, General Bert and I take preventive steps every single day to make sure that we are not the “one of 3” who will develop this (or any other) chronic disease.

I have treated many, many people who did have cancer, including General Bert in 1994, often after their immune capacity was smashed flat with chemotherapy and radiation. And most of them have done exceedingly well (remember, “cure” is a forbidden word when nutrients are involved!)

I am pretty skilled and experienced in preventing and treating cancer. If I were confronting that diagnosis for myself or someone I care a lot about, here are the steps I would take at the earliest possible date:

1. Immediately start taking high doses of CBD to promote cellular and immune homeostasis. I would either take 3 to 4 *UPWARD™* CBD 25 mg Capsules per day or 2 to 3 droppers full of *UPWARD™* CBD 1500 mg oil. <http://www.nsfmarketplace.com/product-category/cbd/>

Since the capsules are formulated for exceptional absorbency, they act like about 3 times as much CBD in your body. They contain immune supporting Fucoidan and antioxidant Astaxanthin and green coffee extract plus protein-repair powerhouse d-Ribose.

The CBD oil is highly concentrated but mild and easy to hold in your mouth for 30 seconds or so before swallowing. Each dropper full delivers 50 mg of CBD. If I had cancer, I would want to have between 100 and 200 mg of CBD supplement in my body daily. If the malignancy were on the surface of my body, I would rub pure CBD oil on it several times per day.

Either the capsules or the oil CBD delivery system is wonderful.

2. I would immediately watch the entire Natural Cancer Prevention series, Click here, <https://qt247.isrefer.com/go/NCP16order/DrRima/>, to learn how to alter my choices toward health promotion even as I deal with the diagnosed problem and

3. I would add Nano Silver 10 PPM per day to my routine so that any infection (and many say cancer is, in fact, only possible with a yeast infection present) would be dealt with through powerful

Natural Solutions Foundation
PRIVATE & CONFIDENTIAL

immune support. I personally would take 1-2 caps-full in the morning and the same in the evening. There is no problem taking it with or away from food. <http://www.nsfmarketplace.com/product-category/nano-silver-10-ppm/>

4. I would make sure that I was using natural remedies, like genuine GcMAF and the best available probiotics, daily.

5. I would immediately begin consuming ONLY certified Organic or Biodynamic food, choosing whole foods without processing or preservatives but would include raw, fermented foods like organic sauerkraut, Kim Chee and the like in my diet.

I would follow an organic grain-free vegan diet for 3 months so that the pro-inflammatory impact of animal products, and the production of arachidonic acid which promotes the inflammation that cancer cells use to hide from immune destruction, would be reduced.

Arachidonic acid is necessary for neurological and other organ systems, but while the body is dealing with a malignancy, it is best to give it an advantage by reducing inflammatory products the cancer can hide behind. After 3 months, I would review my dietary choices.

I would reduce or eliminate simple carbohydrates like refined flour and sugars altogether.

6. I would make sure that my consumption of healthy fats was supporting my immune system in the strongest way possible. I would emphasize CLA (Conjugated Linoleic Acid), MUFAs or Monounsaturated Fats like those found in organic avocados and macadamia nuts and organic, wild-caught low radiation oily fish like mackerel and salmon for their Omega 3 content.

Note that all of these healthy oils must be clean, and that means certified organic or biodynamic, wild caught, low radiation. It all matters very much.

7. I would make sure that I was getting as much exercise as I could ever single day. I would do that because exercise enhances both mood and immune function and because it increases oxygen uptake. Both are essential for fighting cancer.

8. I would spend serious time meditating and introspecting about my life, my relationships, my historical baggage and so on. Knowing that our emotions and our immune systems are really part of the same indivisible holistic unit and knowing that every single cancer patient I have ever encountered

was deeply angry, I would find out where I have been and chart my emotional course about where I am going with honesty and certainty.

9. I would NOT attempt to treat my cancer myself. Instead, I would seek the consultation and guidance of a nutritionally trained physician who can properly interpret the lab tests (and order them) and guide the treatment to my exact needs. Two organizations of such doctors are the American Academy of Environmental Medicine, www.AAEM.com, and the American College for the Advancement of Medicine, www.ACAM.org.

10. With the help of the doctor I chose from the options above, I would undergo a deep detox which might focus on heavy metal or other contaminants and develop a full nutritional program using high potency supplements and herbs such as Pau D’Arco, Graviola, etc.

I might also make use of techniques like High Dose Vitamin C IV drips, DMSO IV, hyperthermia and so on. Clearly, these require the input of a skilled and well-trained nutritional/environmental physician.

11. What I would NEVER do is chemotherapy or radiation.

Yours in health and freedom,
Dr. Rima

PS: Everybody’s body deals with dis-regulated cells every day. Just adding CBDs and Nano Silver 10 PPM to a healthy diet and lifestyle has the potential for adding decades of great health and a sharp mind to a long life. www.NSFmarketplace.com REL

PPS: In 1994 General Bert was diagnosed with terminal prostate cancer. I treated him naturally – and totally successfully. Twelve years later he is, as I write this, kindly building a closet for me. *Terminal?* I think not! REL

Then I wrote this reply to the supposed Mom of the supposed “baby” with whooping cough⁷⁹ after a commenter stated that everyone who was opposed was a “stupid internet pug”:

“I am not an untrained internet pug. I am a licensed medical doctor and your facts are simply wrong. Your assertion that people who are concerned about vaccine safety “prefer to see 100 babies die of whooping cough rather than 1 child suffer a vaccine side effect” is a pretty good indication that, however good your intentions might be, your sifting, sorting and separating of fact from public relations/propaganda is woefully inadequate and you are pushing out the party line without examining the reality.

Do so, and you will surely change your tune if you are, indeed, an honest and concerned medical practitioner.

⁷⁹ http://www.essentialbaby.com.au/pregnancy/pregnancy-health/devastated-mums-whooping-cough-vaccine-plea-20160405-gnypzg?utm_source=facebook&utm_medium=cpc&utm_campaign=social&eid=socialn:fac-140mn0583-optim-nnn:paid-25/06/2014-social_traffic-all-postprom-nnn-ebaby-o&campaign_code=nocode&promote_channel=social_facebook

Natural Solutions Foundation

Of course, you will have some serious problems with your medical establishment and if you are a coward, fearful for your own interests, will back down and continue vaccinating, spreading misinformation and harm as you go.

Of course, since I do not know you I cannot say if you are, indeed, a person of integrity who, having had the light of independent, not corporate, science in your eyes, will, in fact, take the high, hard road and tell the truth, refusing to inject massively dangerous toxins into people for the sake of your own convenience and comfort.

Right now, you probably really believe what you write.

Here's a place to get started on that high, hard road: [www.http://TinyURL.com/DrRimaIndiaPaper](http://TinyURL.com/DrRimaIndiaPaper) .

Although it does not specifically deal with pertussis vaccines, the many references and the orienting information there will get you started.

Cheers.
